Education

Birla Institute of Technology and Science, Pilani **2021 – 2025**
Bachelor of Engineering in Civil Engineering *Pilani, Rajasthan, India*

Experience

Associate Product Manager **May 2025 – Present**
UnifyApps *Dubai, United Arab Emirates*

- Led end-to-end delivery of an **eKYC/passport verification** pipeline for a government entity, designing a multi-score verification matrix and automated identity validation logic.
- Owned delivery of a **last mile shipment visibility** and driver check-in solution for a global supply chain client, coordinating partner/vendor integrations across tracking, authentication, and POD workflows.
- Worked on a billing and discharge workflow system for a healthcare client, streamlining operational handoffs across hospital systems.
- Delivered **SAP S/4HANA** Cloud integrations for an enterprise client, including bulk journal entry processing and cross-system API debugging.
- Managed and mentored a team of analysts, directing analytics, scripting, solution development, and QA workstreams while owning delivery quality across client engagements.
- Standardized production release processes by authoring an SOP adopted across delivery teams, improving deployment consistency and reducing rollout errors.
- Owned requirement-gathering and solution scoping across client engagements, translating business needs into structured technical specifications for engineering handoff.

Software Engineer **Jan 2024 – May 2025**
Simplismart *Bangalore, India*

- Developed proxy services in Golang for various SOTA models, improving request throughput by **3x** while reducing latency by **22%**
- Engineered a federated monitoring system for tenant-specific observability, reducing debugging time by **60%**
- Deployed WAF on AWS for threat intelligence, preventing **10k+** malicious requests per day with fine-grained rate-limiting
- Optimized infrastructure provisioning for long-running AI pipelines, reducing provisioning time by **70%**
- Automated application deployments using ArgoCD, cutting release times from hours to minutes

Google Summer of Code 2024 **May 2024 – August 2024**
MetaCall - MacOS Distributable For MetaCall *Remote*

- Developed a CI pipeline for automatic compilation and testing of MetaCall binaries across multiple architectures
- Integrated **8** language loaders (NodeJS, Java, Python, TypeScript, Ruby, Wasm, Go, Cobol) for MacOS portable
- Updated the install script to support MacOS installation, reducing installation time by **40%** vs. compiling from source

Software Engineer Intern **January 2023 – April 2023**
Flippy *Bangalore, India*

- Designed a caching system for microservices using AWS ElastiCache, reducing database calls by **60%**
- Setup a real-time lambda service to provide near real-time tick data, reducing latency times to **20ms**
- Migrated microservices to AWS ECS with Elastic Load Balancer, reducing downtime by **65%**

Google Summer of Code 2022 **May 2022 – September 2022**
52°North - Python client for OGC Maps API *Remote*

- Created a Python wrapper for OGC Maps API with feature flags, parameter validation, and blob data handling
- Set up automated tests, git hooks for code quality, and a CI/CD pipeline to auto-generate Sphinx documentation

Projects

G-Meet Auto Join Chrome extension to automatically join Google Meet meetings at scheduled timestamp
PyPSI Python wrapper for Google PageSpeed Insights to generate lighthouse metrics for multiple devices
Go-Carbon An unofficial REST API for the Carbon project written in Go, with a 3x performance speed

Skills

Languages: Python, JavaScript, Go, TypeScript
Platforms: GCP, AWS, Kubernetes, Docker, Terraform, Apache Airflow, Apache JMeter, Android
Observability: Grafana, Prometheus, OpenTelemetry, SigNoz, Elasticsearch
Frameworks: React, React Native, Fiber, FastAPI, Node.js, Flask, Django, Nginx
Databases: MySQL, Postgres, MongoDB, Redis, Memcached, Kafka
